0261 - Graph Valid Tree

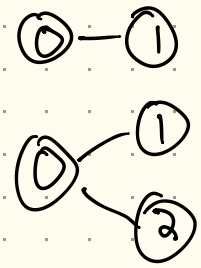
```
def valid_tree{ n: int
              { edges: list[list[int]]
```

Pair Tuple -> bool

- connected all nodes 0 to n-1
- acyclic

⓪ For all nodes to be connected for n nodes n-1 edges ONLY

① DFS from 0



```
dfs(node, parent_node) -> bool

    for nei in adj_list[n]:
        if nei == parent_node:
            continue
```

skip parent b/c undirected edges

TC: O(n + e)

SC: O(n + e)

[[a,b]] -> a: b
b: a

arg adj_list

Union Find

⓪ union find every edge

① all(find(x) == find(0))
