134 - Gas Station

Guaranteed 1 unique solution

gas	1	2	3	4	5	gas avail at i
cost	3	4	5	1	2	gas needed to go to i+1
diff	-2	-2	-2	3	3	

All 3 starting con't work

- If sum(gas) > sum(cost) any index that can maintain positive balance to end is res
- First index that can reach the end will have the highest gas total

TC: O(n)

SC: O(1)
