5. Longest Palindromic Substring

$f(l, r) \mid l, r \in [0..len(s))$

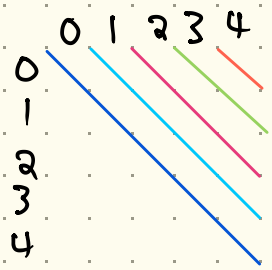
$l == r \rightarrow$ True

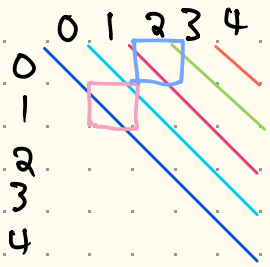
$r - 1 == l \rightarrow nums[l] == nums[r]$

Otherwise $\rightarrow nums[l] == nums[r]$ and $f(l+1, r-1)$

$f(0, 2) \rightarrow f(1, 1)$

$f(0, 3) \rightarrow f(1, 2)$





⓪ Do both base cases

① Do every length from 3.. len(s)

a b c
l r
0

3 - 3 = 0

```
for curr_len in range(3, len(s)):
    for l in range(len(s) - curr_len + 1):
        r = l + curr_len - 1
```
