

229 - Majority Element 2

Find all elements that appear more than $n/3$ times

- There are at most 2 solutions to the problem

BF: Hashmap count $O(n)$ space

1 2 3 1 2 1 : 2 5 / 3 = 1.66
 2 : 2
 3 : 1

1 1 1 1 2 2 2 3 3 3 $10/3 = 3.3$ 1:4
2:3
3:3

- keep a hashmap of size 2

- Iterate through the array, add chars to the counter

⑥ mp has 3 keys, decrement by 1

① Remove all 0 freq

② Check if actually $> \text{len}(A) / 3$

$[1, 1, 1, 2] \rightarrow mp \begin{matrix} 1 \rightarrow 3 \\ 2 \rightarrow 1 \end{matrix}$
