31. Next Permutation

next lexicographically greater

0 1 2 3 4 $\quad i = l - 1$

$\quad\quad i \quad l$

1 2 5 7 6 $\quad\quad l-1 \quad l$

1 2 6 7 5 $\quad\quad 5 > 7$

1 2 6 5 7

⓪ Calculate i, l, nums[l:] is monotonically decreasing

i is the first element that break that

① Swap nums[i] and nums[r] $\quad$ iff $i >= 0$

lowest val digit greater than nums[i]

② reverse nums[l:]
