394. Decode String

3[a2[c]]

c
[
2
a
[
3

]

'c' · 2 = cc

a
[
3

]

pop 2nd
pop 1st

'acc' · 3 =

] append and reverse

⓪ Chuck everything in the stack if not]

A singular expression is composed of

23[ab12c

freq word

word = needs to be FLIPPED LIFO

freq = ~~reverse b, · 10 + int(c)~~

doesn't work bc of 100 -> 1

collect it in string representation + convert
