227. Basic Calculator II

- Use a stack to hold all signed numbers
- sum them all at the end
- $2 + \underbrace{2 \cdot 2}\ \underbrace{+}$ On seeing + eval() -> [-2, 4]

$3 + 2 \cdot 2$

- 3 - 5 / 2

0: prev_operand: -

1: digit: 3

2: prev_operand: - stack: [-3]

3 digit: 5

4: prev_operand: / stack: [-3, -5]

5: digit: 2 stack: [-3, -5, 2]

[-3, -5 / 2]

- 3 - 5 / -2 (Invalid input)

prev_op: + - \ •

stack: list[int]

curr_num: int

```
for c in s:
    numeric -> add to curr_num
    +/•-    -> add curr_num to stack
                if / • :
                    pop two from the stack, operate
```
